DETAILED ACTION

This Office action is in response to the preliminary amendment filed on 8/4/2006.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nohara et al. (2002/0023603).

Regarding claim 1: Nohara discloses a variable valve operating device for an engine to adjust a valve lift and a valve timing of the engine (see figure 1), comprising: a rocking cam which is rocked by a cam provided on a rotatable cam shaft (see numerals 13,20); a rocking cam support member that rockably supports the rocking cam (see numeral 26); a valve which is opened and closed by a rocking motion of the rocking cam (see numerals 12,19); a rocking position changing unit that moves the rocking cam support member to change a rocking position of the rocking cam (see numerals 18,16); and a lock unit that can fix the rocking cam support member so as not to move during a valve-opening period of the valve (see numeral 30).

Regarding claim 8: Nohara discloses the rocking position changing unit comprises: a turnable control shaft (see numeral 16); and a push moving positioning member that pushes and moves the rocking cam support member to position the rocking cam support member by turning the control shaft to change a rocking position of the rocking cam (see numeral 18).

Allowable Subject Matter

3. Claims 2-7,9-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 17-19 are allowed.
